OT-5275Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application:

Listing of Claims:

1. (Currently Amended) A device for indicating a direction of movement of a passenger conveyor, comprising:

a handrail entry module having an opening through which a passenger conveyor handrail passes and a support surface having one end beneath the opening and a second end that is configured to be positioned adjacent a landing surface at one end of an associated conveyor; and

a display on the support surface that is adapted to be placed beneath a handrail near a landing at one end of the conveyor the opening such that the display is visible to an individual approaching the end of the conveyor.

2. (Currently Amended) The device of claim 1, wherein the display includes a display screen ~~supported on a surface that is at least partially at an oblique angle relative to the landing~~ when the display is placed beneath the handrail.
3. (Original) The device of claim 1, wherein the display comprises an electronic display panel.
4. (Original) The device of claim 3, wherein the display is lighted.
5. (Original) The device of claim 3, wherein the display comprises a liquid crystal display panel.
6. (Original) The device of claim 1, including a controller that controls an indicator on the display and wherein the controller automatically sets the indicator to correspond to a direction of movement of the conveyor.

7. (Original) The device of claim 6, wherein the controller uses information regarding a direction of movement of a motor of the conveyor to determine the corresponding indicator.
8. (Cancelled)
9. (Currently Amended) The device of claim-8~~1~~, wherein the support surface is curved.
10. (Currently Amended) A passenger conveyor, comprising:
 - a plurality of steps that move along a selected path between two landings;
 - a handrail that moves with the steps;
 - a handrail entry module that includes an opening through which the handrail passes and at least one support surface positioned beneath the handrail near between the opening and a corresponding one of the landings; and
 - a display associated with on the support surface between the opening and the landing such that the display is visible to an individual approaching the landing, the display providing an indication of a direction of movement of the steps.
11. (Original) The passenger conveyor of claim 10, including a handrail on each side of the steps and a display beneath each handrail near each landing.
12. (Currently Amended) The passenger conveyor of claim 10, wherein the support surface is at least partially at an oblique angle relative to the landing ~~and the display is supported on the surface.~~
13. (Currently Amended) The passenger conveyor of claim 10, ~~including a wherein the handrail entry module that includes a generally vertical portion that has an opening through which the handrail passes and wherein the support surface extends generally down and away from the vertical portion and wherein the display is positioned on the support surface.~~

14. (Currently Amended) The passenger conveyor of claim ~~13~~10, wherein the support surface is curved.
15. (Original) The passenger conveyor of claim 10, wherein the display comprises an electrically powered indicator.
16. (Original) The passenger conveyor of claim 15, wherein the display is selectively at least partially lit to provide the indication of the direction of step movement.
17. (Original) The passenger conveyor of claim 15, wherein the display comprises a liquid crystal display panel.
18. (Original) The passenger conveyor of claim 10, including a controller that controls the indication on the display and wherein the controller automatically sets the indication to correspond to a direction of movement of the steps.
19. (Original) The passenger conveyor of claim 18, including a machine that propels the steps in a selected direction and wherein the controller uses information regarding operation of the machine to determine the corresponding indication.
20. (Original) The passenger conveyor of claim 19, wherein the controller controls operation of the machine and the display.

21. (New) A passenger conveyor, comprising
- a landing surface at each of two landings;
 - a plurality of steps that move along a selected path between the landings;
 - a handrail that moves with the steps;
 - a handrail entry module having an opening through which the handrail passes near one of the landings; and
 - a display supported on the landing surface lower than the handrail entry module opening, the display providing a visible indication of a direction of movement of the passenger conveyor.
